### In the News

- New <u>transmucosal immediate-release fentanyl</u> REMS requires prescriber & pharmacy to document opioid tolerance with every prescription
- CDC reports that during a 12-month period, COVID & illicit opioids are driving record high overdose death rates.
- Black physician complains of racist denial of pain treatment; treated like an addict, before being discharged & dying from Covid-19.
- IASP welcomes the <u>United States Association for the Study of Pain</u> chapter to improve pain research, practice & policies.
- Justice Department sues Walmart for alleged role in opioid crisis, despite facts they blocked filling questionable opioid prescriptions.
- References to "opioid overdose death" should be replaced with the more accurate "polysubstance-overdose death" crisis.
- Veterans still endure ineffective treatment of chronic pain given the VA system's strict adherence to disputed CDC opioid guidelines.
- In Massachusetts, electronic prescriptions are now required for controlled substances and medical devices. Prescribers must enroll.

## **Journal Watch** [MGHers can obtain articles through the Treadwell home page]

- Venkatesh KK, Pate V, Boggess KA, et al. <u>Trends in opioid and psychotropic prescription in pregnancy in the United States from 2001 to 2015 in a privately insured population: a cross-sectional study</u>. *Ann Intern Med.* 2020; Dec.173(11\_Sup):S19-S28. Over 15-years, the rate (10%) and dose of opioids prescribed pregnant women decreased but the rate of prescribed psychotropics (6%) remained unchanged.
- Cogan J, André M, Ariano-Lortie G, et al. Injection of bupivacaine into the pleural and mediastinal drains: a novel approach for decreasing incident pain after cardiac surgery Montreal Heart Institute experience. *J Pain Res.* 2020 Dec (13): 3409—13. Pleural & mediastinal drain injections of 0.25% bupivacaine (20 mL) after heart surgery effectively cut drain-related pain within 10 minutes; without added infection risk.
- Kelley-Quon LI, Kirkpatrick MG, Ricca RL, et al. <u>Guidelines for opioid prescribing in children</u> and adolescents after surgery: an expert panel opinion. *JAMA Surg.* 2021 Jan 1;156(1):76-90. Education & opioids-sparing approaches are needed for children/parents to cut misuse risk.
- Turner KM, Wilcox G, Nordstokke DW, et al. Executive functioning in youth with and without chronic pain: a comparative analysis. *Clin J Pain*. 2021 Feb 1;37(2):102-117. Chronic pain impairs youth's attention, memory, cognitive processing speed, fatigue, mood & ADL's.
- Wang L, Zhang L, et al. Effectiveness of pain coping skills training on pain, physical function, and psychological outcomes in
  patients with osteoarthritis: A systemic review and meta-analysis. Clin Rehabil. 2020 Oct 26. Pain coping skills training for those with
  arthritis helped improve in pain, function, coping and a positive outlook that wasn't improved further with the addition of exercise.
- Osborne NR, Cheng JC, Rogachov A, et al. Abnormal subgenual anterior cingulate circuitry is unique to women but not men with chronic pain. *Pain*. 2021 Jan;162(1):97-108. Functional connectivity in key neural networks may explain gender differences in chronic pain rates.
- Thomaidou MA, Veldhuijzen DS, et al. An experimental investigation into the mediating role of pain-related fear in boosting nocebo hyperalgesia. *Pain*. 2021 Jan;162(1):287-99. Induced pain-related fear increases sensitivity to pain, especially with high intensity pain.

## **Journal Watch** (continued) [MGHers can obtain articles through the Treadwell home page]

- Gao H, Xu G, Li F, et al. Effect of combined pharmacological, behavioral, and physical interventions for procedural pain on salivary cortisol
  and neurobehavioral development in preterm infants: a randomized controlled trial. *Pain*. 2021 Jan;162(1):253-62. <a href="Procedural pain & stress">Procedural pain & stress</a>
  in preterm infants is lowered with combined methods, including: massage, music, sucrose non-nutritive sucking & human touch.
- Warren C, Jaisankar P, Saneski E, et al. Understanding <u>barriers and facilitators to nonpharmacological pain management</u> on adult inpatient units. *Pain Manag Nurs*. 2020 Dec;21(6):480-487. Target knowledge, attitudes & use of nondrug relief measures to enhance its utilization.
- Khaw D, Bucknall T, Considine J, et al. Six-year trends in postoperative prescribing and use of multimodal analgesics following total hip and knee arthroplasty *Eur J Pain*. 2021 Jan;25(1):107-121. <u>Multimodal analgesics improves movement evoked pain & sleep</u> after arthroplasty.
- Rouch I, Edjolo A, Laurent B, et al. Association between chronic pain and long-term cognitive decline in a population-based cohort of elderly participants. *Pain*. 2021 Feb 1;162(2):552-560. A 15-year study concludes: <u>treat older adults' pain to prevent accelerated cognitive decline</u>.
- McAfee J, Boehnke KF, et al. Perioperative cannabis use: a longitudinal study of associated clinical characteristics and surgical outcomes.
   Reg Anesth Pain Med. 2021 Feb;46(2):137-144. Cannabis use is linked to more postoperative pain, opioid use, impaired mood & functioning.

#### Pain Resources on the Web:

- IASP launches the 2021 Global Year about Back Pain by providing free multilingual facts, webinars, toolkits, research stimulus & resources.
- Description of the top pain-relieving devices on the market; including phototherapy; neuromodulators, heating/cooling devices and more.
- New potential analgesics of the future, <u>JAK inhibitors</u> for arthritis, <u>glial cell modulators</u> for neuropathic pain & <u>kappa agonists</u> for inflammation.
- Correcting unconscious bias in assessing pain is a starting point to address <u>major ethnic disparities in pain treatment</u> & quality of outcomes.

# Complementary Integrative Health

- Cognitive-behavioral intervention toolkits for children & parents cut the pain of venipunctures compared to restraining the child.
- Qigong mind-body exercise is a safe method to reduce persistent physical & psychosocial discomforts after breast cancer surgery.
- People <u>taking glucosamine & chondroitin for a year</u> have a 39% lower all-cause mortality risk (65% lower CVD risk)
- Percutaneous ultrasonic tenotomy cuts pain and disability scores for persistent tendinopathy after conservative treatment fails.
- In addition to standard care, <u>Virtual Reality reduces pain and anxiety during cancer treatment</u> & pediatric procedures.
- Eight sessions of <u>electroacupuncture improves pain & functioning a month after spine surgery</u> for low back pain when added to usual care.

# Pain-Related Education Opportunities

- FDA-approved Risk Evaluation and Mitigation Strategies (REMS) for opioids updated online training & resources.
- Wed Mar 3 Advancing Pain Relief Virtually to better understand/treat pain & suffering; while tearing down silos
- Fri-Sat Mar 5-6; Live streamed Kauai Pain Conference will review evidence-based & best practice approaches to biopsychosocial care.
- Thu May 20 AAPM Annual Meeting: focuses on multimodal and multidisciplinary approaches virtually this year.

## MGH Pain Calendar Virtual Rounds

- Palliative Care Grand Rounds are held Wednesdays from 8:00 AM 9:00 AM. Contact: Gail Chin for more information
- MGH Inter-professional Pain Rounds First and third Wednesday of month from 12–1pm. Email Tina Toland for more info
